FCC Statement

This device complies with FCC rules and is authorized to operate in the United States of America. This device complies with FCC Rules, Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. The equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To avoid potential compliance, any change or modification not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example: use shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter. Question is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to the equipment. Such modifications could void the user authority to operate the equipment.

IC Statement

This device complies with Industry Canada RSS-210. Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) This device must accept any interference received, including interference that may cause undesired operation of the device, even if the transmitter is not intended for its intended use.

The device meets the exemption from the routine evaluation limits in section 2.5 of RSS 102 and compliance with RSS-102 RF exposure, uses an obtain Canadian approval for RF exposure and compliance.

The present approval is confirmed by the Canadian approval of the device. The approval is subject to the following conditions: (1) The device must not cause harmful interference to the radio or television reception, which can be determined by turning the equipment off and on. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To avoid potential compliance, any change or modification not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example: use shielded interface cables when connecting to computer or peripheral devices).
