Many electrical items can be repaired or recycled, saving natural resources and the environment. If you do not recycle, electrical equipment will end up in landfill where hazardous substances will leak out and cause soil and water contamination – harming wildlife and also human health. Batteries containing hazardous materials such as mercury (Hg), cadmium (Cd) or lead (Pb) are marked with their chemical symbols as well. This symbol means that electrical equipment can be recycled. It is now marked with a crossed out wheeled bin symbol. Please do not throw any electrical equipment (including those marked with the crossed out wheeled bin symbol) in your bin.
